Drought-Tolerant Seneca Cotton Grows In Africa Enlarge this image toggle caption Mladen Antonov/AFP/Getty Images Mladen Antonov/AFP/Getty Images When you hear people talk about living in a village, you may imagine warm places that grow things like rice and corn. This is not the case for some of the villagers in a city in southern Angola called Lubango. Like most people, they are subsistence farmers. But they've been finding ways to grow food in a place where the soil is hard, water is scarce and they've been struggling for years with too little rainfall. They've been planting rows of cotton, and it's been a success. Enlarge this image toggle caption Zach Urness/Statesman Journal Zach Urness/Statesman Journal The world is currently in the middle of a drought. In southern and eastern Africa, most of the countryside is parched. "So, there's no cotton and you can't go to the rice fields," Vivian Lovejoy, who works for the nonprofit Drought Tolerant Cotton Initiative, told me. Lovejoy and her colleagues work with farmers in dry, arid regions in Africa. They've developed and are commercializing strains of drought-tolerant cotton that are low in sodium and high in protein. Over the last 20 years, many people have been looking at the problem of declining soil fertility and using crops like cotton to turn that soil back into a fertile, productive resource, says Lovejoy. In the United States, the crop includes a fruit called an acorn squash that, in the right conditions, is eaten

## Search KWIC Concordance Incl Product Key

Search KWIC Concordance has 2 easy steps: \* Search for words in a file \* View concordance information One of the great features of Search KWIC Concordance is that it allows you to generate a concordance in Word Using Word as the document editor the built in Search KWIC Concordance tool can be added to the toolbox. If you load a file in Word you can use the built-in Text to Speech function to have all the words that the tool finds spoken aloud to you. You can then use the KWIC statistics to determine what words have the greatest, average and least frequency and the current length of the words as well as the longest words. After the analysis is complete the concordance is stored in a file so you can view the results. Note: Unlike other apps such as NTFSLinguist, KWIC Concordance does not merge / merge similar words together. KWIC Concordance will generate concordances by matching to the specific word in the file specified in the Top Tools section of the program. The tool will generate an ASCII concordance file for any one or many text files and it's easy to export this concordance to Excel if you wish. The top 5 of words used with the specified keyword is displayed for your convenience. This utility will provide you with the information about your keywords and the information about the key words you specified in your output file. In case the output file is large it will be split into two parts. The first part will contain the list of keywords. The second part will contain the Full concordance with the information about the frequency of your keywords. The two numbers in the second part are the total of the keywords in the first part and the second part respectively. Warning: The full output file will be split into two parts. It is important for you to understand the difference between the two parts before running the utility. The first part will contain the list of keywords and the second part will contain the full concordance information. It's also important to note that if the output file is too large then only the first part will be displayed. KWIC Concordance can work on both Mac OS and Windows XP/Vista. KWIC Concordance's features are not limited to only 1 language, it also supports several foreign languages, such as English
