Use Markup Assist to quickly generate the markup for a drawing. In the Markup Assistant window, use "Type" to add text, images, or objects to your drawing. Use the "Match" tab to match the selected objects to existing objects. (video: 3:00 min.) Lock Markup: The same drag-and-drop behavior that makes possible to lock a layer or layer group is now available to make changes to a drawing's markup. Lock the markup, and create and modify the markup at the same time. (video: 1:40 min.) Lock the markup to prevent unintentional editing of the markup. To begin editing, select the markup to lock. Locking will take you back to your drawing, but with a locked markup you can edit the existing markup, or add new, customized markup. (video: 3:50 min.) Lock/Unlock Drafting Using Dynamic Styles: Drawing creations made with Dynamic Styles can now be marked up as AutoCAD objects using the Markup Assistant. A style guide will open in the Markup Assistant window. Simply drag and drop your content from the style guide into the Markup Assistant. (video: 4:00 min.) Add text and shapes to your drawing, change and modify them in real-time, and save to a new style. (video: 2:30 min.) The Markup Assistant window opens as a snapshot of the style guide, where you can drag and drop any of the style's built-in shapes to make your content. (video: 4:30 min.) Create, view, and modify artboards: Create new or existing artboards in a document using the Artboard Browser. Artboards make it easy to arrange artwork on a page. You can also add an artboard to a drawing and remove it from a drawing. (video: 1:50 min.) View artboards in the same way that you view layers or layers groups. You can also view and manage artboards without leaving the drawing. Use the new Artboard Properties tool to see detailed information about your artboards. (video: 3:00 min.)
