Flex - TypeScript - Electron - Styling - App Imports Flex - TypeScript - Electron - Styling - App Imports Flex - TypeScript - Electron - Styling - App Imports Go to see more details about this course's contents. I want to explain the three magic lines I use to import all the fonts I use in my projects so I can make sure that the end result can be reproduced everywhere. It can be easily done by just typing three lines of code in your terminal and you'll be able to use all the fonts you need in your Electron or any other type of application. This video will teach you how to create an app that loads the fonts you need for your application. Content from my other videos: Introduction to Layout - All the fonts used in my private, commercial and educational apps can be downloaded here: Flex - TypeScript - Electron - Styling - App Imports Go to
