Hands down the best fantasy RPG for iPhone. The graphics are amazing and you can choose what kind of character to make (male/female) as well as what armor and weapons to use. After creating a character you're thrown into the story which is great and fun. The battle system is addictive and strategic. It's relatively small so you can finish it in 2-3 hours (if you're really focused). It's a buy if you love a good RPG and don't mind the price...Expand This is one of the best RPG's in mobile gaming. Combat is addicting. The graphics are amazing and the gameplay is smooth and easy to learn. Several characters to make, you can choose to be male or female. The story is good if you like a good fantasy story. Overall this is a must have game for your ipad. This game has the potential to be the best game on the App Store. I am a big fan of Telltale Games, and have played "The Walking Dead," "Game of Thrones," and "The Wolf Among Us." I give this game a 5-star rating because of how much Telltale has contributed to the genre of adventure games in the App Store. I have a high expectation for this title to be at least as good as "The Wolf Among Us." ...Expand If you've played The Walking Dead before, you'll know that it's hard to create an overall good game. So telltale made the best of it. made a story that kept your attention and made it all worth it. it's easy to click buttons and run around, but it's clear this game was put a lot of hard work into. it's not perfect, not even close, but it makes for a very enjoyable game. #### **What's new in Elden Ring:**

The latest client update has been a long time coming. The main goal for the v3.2 update was to add more story to the multiplayer client, which I am very happy with the results. Previously, the update release notes assumed that players knew the basics of the story. Now that most of the players have experienced the adventure that unfolds in the Lands Between, I feel like I need to go into much greater detail on the story modes and twists that you will encounter in the game. Let's get started. The classic Lands Between client is where the classic Lands Between server was originally created for. I have opened up the code and had the client ported back to the classic LAN server, but I cannot just assume that everything will play perfectly. There are significant differences with the code and the way things are built. So I have had to go back to the drawing board. I have, however, tested that the game server works and most of the players have experienced all the areas on the classic LAN server. I have even managed to create a special place in the lands that players can go to to experience the extremely intense Ranger game, and we even have special (training)sides for Rangers and Hunters. Requirements: Windows 7 or 8 Demo1: How We Get Your Info: When you purchase Lands Between, the game will give you an email address to contact the owner of the account. You can see this information when you purchase the game at the store, or once you have played the game. Demo2: Coin of Silence Your Enemies: In this demo you will learn how to get the coin of silence in order to silence an entire group of the enemy. Follow these steps: 1. Go to portal 2 2. Go towards the portal that leads to the lands between and speak to Villager Ned 3. Once you have spoken to Ned, he will give you a telepathic message. 4. Once the message is read, players will begin attacking you. 5. Simply shake the window or press [V] to apply the poison. 6. Using the menu, jump to the "armour" tab (by choosing "goal health" in the info menu). 7. Click "free the enemy". 8. Go back to the "goal health" tab and hit "inject the spell". 9. You should now be able to walk away from this group with the coin to silence them. Tutorial1:
