Let's be honest, video games have always been about looking cool. For a few years now we've had high-end graphics that look amazing. We've gone from "if" to "whenever," and now even looking up to the sky won't stop the launch of a new, flashy game from delivering awe-inspiring visuals. When there is just too much to show in a game, things can get messy. And that's exactly what we're going to explore in this article. FIFA 22 is one of the most anticipated games of the year and it has the backing of one of the most recognized developers in the world, Electronic Arts. What can one expect from such a prestigious title? We'll be taking a look at various aspects of the game to see how it holds up. The AFC and the latest version of FIFA in terms of gameplay, the two main components of the game are the new engine and real players. The new engine gets far greater attention and detail. FIFA 22 will be the first game on a new next-generation console, the Xbox One, and builds on the Xbox 360's major success. Here, EA is looking at giving the game some big improvements in visual quality and user-experience. The new engine is called "Ancestry" and is a complete overhaul of FIFA's developer, Exient. The improvements are in the areas of physics, player models, animations and environmental detail. But this new engine isn't the only thing people can expect to see in FIFA 22. The FIFA team also has a goal of unifying the teams and players from around the world. They hope that by unifying the English, German, Italian, Spanish, Brazilian, and French teams into the same team as the English, that it will reflect the global nature of the sport. Each of these changes are already active in the "Current Player Pack." The "Future Player Pack" is just around the corner, and will launch on Xbox and PSN on May 29th for PS4. Thinking back to 2018, the most popular "player pack" for FIFA was the "FIFA 18 All-Stars Team." The All-Stars team took the top team in FIFA 17 and combined them with some of the top players in
