The Crown Deluxe Reverb is a versatile reverb plugin, which can be used for both dry and wet mixes. With just a touch of the knobs, you can create complex reverb scenarios with the studio-quality reverb of the manual oscillator or switch between the two oscillators for a more synth-like sound. As with all Crown plugins, the goal of this reverb is to add a sense of space to your mixes. This is achieved by creating spacious reflections of the source material (just as it would be heard in an actual recording studio). From subtle, easy-to-adjust, room-like reverbs to more roomier spaces, there are many settings to choose from to create specific reverb effects. The size of your room is one of the most important aspects of the reverb. Without having to choose between great ambient reverb and tight, roomy reverb, the user-friendly parameters allow for a wide range of settings. The adjustable frequency response control is used to control how much of your frequency range will be affected by the reverb. The higher the number, the more of your frequency range will be affected, which creates a more spacious sound. The decay rate is used to control how quickly a reverb tail fades out, while the sound level control is used to affect the overall sound level of the reverb. The Crown Deluxe Reverb is a versatile reverb plugin, which can be used for both dry

What's New In?

Abbey Road Chambers is an audio effect plugin designed to produce the characteristic sound of Abbey Road Studios. This is a very natural sounding reverb and delay effect, and it's designed to give the perfect sound-picture of Abbey Road Studios. These are not 'general-purpose' reverb and delay plugins, this one is designed with a huge passion for creating this kind of audio effect. It contains three main chambers and various room configurations where you can set the size and shape of the room as well as the position of the microphone and the speaker inside the chamber.
