Capsturn software is a innovative application for every construction company. It is a program designed to help you plan everything from designing the building to manpower management. To facilitate the process of planning, this software has a built-in CAD system and drafting tool. It is very easy to use and does not require a high level of expertise. You can also record your drawings and plan any job. There are several functions that make it even more user-friendly, such as load editor and three-dimensional modeling. CAPSTURN\_8.1.zip Size 8 MB Version 8.1. Language English Author Cadem Technologies Pvt. Ltd.. Kapsturn is the world's first CAD management software with the capability of DRAWING AND ANALYZING. All other applications in the market were basically designed to simulate the process of designing the building. The main purpose of planning everything, including manpower and construction material, is to make sure that everything is done as per the specifications. Only CAD can help us in doing so. Kapsturn has its own CAD system. Its amazing that it can help you design the building with the help of traditional tools like drafting or simulation. All you have to do is input all the information about the building into the program. It gives you a 3D view of your project and lets you measure with precision. To design something else than a building, we need to know the purpose of the design. So, the software will give you a breakdown of your design. You will also see several functionalities of
