Mobile Texas Holdem used to be a pretty popular game when it was officially released, but most of the apps that are currently available are clones, or buggy, with a few exceptions. Poker on iPhone, iPad and Android though looks very polished, and it plays really well. You've got all the more standard poker features such as the ability to walk away from the table, and the ability to play against the AI, although you can't really play a live game against it. There are plenty of options available, and the betting table in particular is great. I tested the game by playing in an online cash game against a number of very strong players and I can honestly say it was an excellent experience. The only potential quirk with the game is that it isn't free to play, and you are only allowed a certain number of free games per week. I can say that mobile poker is enjoyable, but it's probably the most buggy. There's a lot of room for improvement and you should never install this from the Apple App Store. The Poker On is one of the most feature-rich apps for playing poker on your iPhone. There are several poker hands cheat sheets to be downloaded online. If you are a beginner at Texas Hold'em, start with a basic one. When you are more experienced you can build your own poker cheat sheet and also try a poker odds cheat sheet. For example, you should not play the same hand from the small blind and big blind as you do from the cutoff and the button. When you have read the article I am sure you will be able to setup your own sheet. How does a poker hands cheat sheet help me to be a better poker player A cheat sheet gives you an overview of which hands to play from which position. For example, you should not play the same hand from the small blind and big blind as you do on the cutoff and the button. As a beginner, it's good to start playing basic, and then develop and play more creatively. Why should I use a Texas Hold'em Cheat Sheet A Texas Holdem Cheat Sheet can be a very important tool, both for beginners and the best poker players. It tells you which hole cards to play on what position. You shouldn't play the same hand in early position and in big blind as you do on the button for example.
